EGYPTIAN GOEIC INSPECTION PROGRAMME

**Regulation and
registration**

**Certificate of
Inspection**

**GOEIC
Requirements**

1. REGULATIONS AND REGISTRATION

The Egyptian Minister of Industry and Foreign Trade issued two Decrees (n. 991/2015, n. 992/2015, and n. 43/2016) regarding the regulations for a certain list of products in export to Egypt.

The list includes foods and beverages, tableware glass articles, household electrical appliances, floor coverings, and footwear.

The Manufacturers or the Trademark Owners must be registered at the General Organization of Export and Import Control (**GOEIC**) of the Arab Republic of Egypt.

2. CERTIFICATE OF INSPECTION (COI)

- The regulated products must be physically inspected to verify the compliance to the order and the shipping documents by an approved and independent inspection company approved and accredited by GOEIC
- The inspection company after the necessary verifications will issue the Certificate of Inspection (COI).
- The COI is necessary to the importing company for successfully complete the custom clearance procedure in Egypt.

3. GOEIC REQUIREMENTS

The process of verification and compliance of the shipment is subject to GOEIC requirements. Here below the procedure for the verification follows the below method.

1. Request of inspection

The Exporter must request the inspection of the single shipment by sending our Application Form to the e-mail controlli@viglienzone.it that includes:

- list of goods;
- HC (harmonized code);
- description of goods to be exported;
- full details of the importer and exporter
- pro-forma invoice, contract and/or letter of credit;
- means of transport;
- test reports of the goods according to the ES (Egyptian applicable Standards);
- proposed date of availability of goods and inspection.

2. Shipment documents verification

Before the date of inspection, the Exporter must send to Viglienzona the list of the documents below:

- Pro-forma Invoice and/or Commercial Invoice
- Packing List
- Letter of Credit (if applicable)
- Test reports of the 100% of the goods issued by an ISO 17025 accredited laboratory. If not available, Viglienzona will perform the necessary tests

3. Inspection of the goods

After the exporter request and receiving the shipment preliminary documentation, Viglienzona will proceed to the physical inspection of the goods at the place and date agreed with the Exporter.

In case the test reports provided by the exporter were declared by Viglienzona as “not valid” we should proceed to sampling and testing the goods in an ISO 17025 accredited and qualified laboratory.

After goods physical inspection, Viglienzona will supervise the container loading and proceeds with the sealing.

4. Collection of the final documents

After the inspection of the goods, the Exporter will provide Viglienzona with the following documentation:

- Commercial Invoice
- Transport document (Bill of Lading or AWB)

5. Issuing of the Certificate of Inspection (COI)

As final step, Viglienzona will review the inspection report and the provided documents. Upon satisfactory results, an Original Certificate of Inspection (COI) is issued.

Viglienzona recommends to the exporter to not to ship the cargo before issuance of the COI.
